# WONDERFUL RECORD These were quickly quarantined and the plague stamped out at once. "Thus by the middle of August, I think I will be able to guarantee that typhus will be a thing of the past in Serbi. Not only that, but we would be greatly disappointed if it ever came again. But still, even in this latter case, Serbia now has at its disposition all of the facilities necessary for speedily combating any outbreak. "The other bright spot which stands out most vividly was the unfalling kindness of Sir Thomas Lipton to the members of the mission. Not only did he cheer us up with words at every moment when cheer was most needed, but his unending efforts to furnish the members of the mission with little odds and

Practical End of Work.

"Following the preliminary organiza tion of a national sanitary board, something Serbia had not had, and the division of the country into sanitary districts, we at once went after the practical end of the work-namely, the chasing down and extermination of the louse from whose bite alone the disease s transmitted.

"As the quickest means of reaching the greatest number of the stricken population in the shortest possible time, we had two refrigerator cars placed at our disposal. In one of these was installed an apparatus for the disinfecting of clothing by heavy steam pressure and its immediate drying afterwards. In the second car was fitted the necessary appliances for a disinfecting bath of the

in this manner.

"Unfortunately, railway communication in Serbia is very limited, and the reaching of the population in the interior presented a different problem. Individual sanitary missions were therefore sent to each important town traveling in military automobiles or carriages, and frequently having their supplies carried in ox carts. Disinfecting and bathing plants were then established in each big center of population and the same process of extermination carried on.

on.

"Where the Serbian government had funds at its disposal these plants were erected at its expense, but where it did not, we paid for them ourselves. A total of fifty-three plants were thus installed by us, and they constitute a permanent part of Serbia's equipment for fighting a similar situation should it ever come again.

"The next most important phase of "The next most important phase of the work was our sanitary assault of the military hospitals. These from the start had been the most prolific centers for the spreading of the disease. They were at all times congested to the limit with wounded or sick soldiers, whose infested clothing quickly spread the disease to almost every inmate.

Against this, and against the former, too, we therefore prepared in our laboratories which we had es-tablished in the old Turkish town of Uskub, a combined serum against Uskub, a combined serum against cholera, typhoid, and paratyphoid.
"In connection with this laboratory work, we started from the very first on a search for the typhus germ, but up to the present moment, complete success has not crowned our efforts. The organism discovered by Dr. Poletz at Mr. ganism discovered by Dr., Plotz, at Mt. Doctors Kept Free. "One of the most happy features of

the whole work was the manner in which we, ourselves, after the terrible which we, ourselves, after the terrible experiences of the Serbian and American Red Cross units, kept free from the disease. Not one of the fifty-four men comprising our mission fell a victim. "In Montenegro we were most fortunate in being able to check the epidemic before it could become general. Dr. Grinnell, of Harvard, who was assigned to that territory, arrived when the disease had only got into the towns, These were quickly quarantined and the

### An Accident Started Henry B. Walthall on Career as a Photoplayer

Accident, which has played an important part in many happen-

ings vital to the world of art and letters, was responsible for Henry B. Walthall becoming a motion picture actor. Two actors rather popular in Washington—A. H. Van Buren and Mark Kent, of the Poli Players—were discussing motion picture production a day or two ago and they agreed unhesitatingly that Walthall is the best actor of all the screen stars—the best purely motion picture actor. They also agreed that Walthall is a real artist and is quite as good in a stage production as he is in the photoplay. Both had known him during his career on the stage, and both have watched his work in the pictures rather carefully.

An estimate of his work from such sources is high praise because it is a most disinterested statement. It simply bears out the conclusion that was reached a long time ago by the patrons of the photoplay. Of his introduction to motion pictures, however, very few people know.

Henry Miller wanted James Kirkwood to play a part in a new play. Walthall, who was a member of Miller's company, and Kirkwood were intimate friends and Miller asked Walthall to locate the missing James. Walthall was sent to the Biograph studio, where Kirkwood was engaged with Griffith making a motion picture.

Walthall regarded motion pictures as more or less of a joke and thought he had a good laugh on Kirkwood—especially when Kirkwood declined to listen to Miller's summons. He introduced Walthall to Griffith and Griffith suggested that Walthall come to the studio next day and appear in a picture—just to while away his time. Walthall agreed. He has been in pictures ever since.

Washingtonians have more or less interest in Walthall, as he he been here. His family has been rather popular actor rather popular in Washinkton—Russell Fillmore, who is also a native of Alabama. Later I became affiliated with the American Theater Stock Company, and soon afterward joined the Providence, R. I., Stock Company. During my stage career I appeared in Winchester, 'Under Southern Skies,' The Great Divide,' Pippa Passes,' The Faith Healer,' The Only Way,' and other well-known productions.

this engagement I went into motion pictures and joined th Biograph Company, which was then under the direction of D. W. Griffith. I remained with Biograph for almost a year, but joined the Reliance when Mr. Griffith took his Biograph Company to California. After a few months with Reliance, I joined Pathe, where I stayed for the balance of the season.

"Taking heart of courage, I decidede to go into the producing business on my own hook, and I formed the first feature film company but was then in existence. The organ-

ization was known as the Union Feature Film Company. The venture was not successful, however, and I again became associated with Griffith in the Biograph Company.

"When Griffith severed his connection with Biograph to produce his own special features and supervise the pictures made by the Reliance and Majestic Companies, I was engaged to play dramatic leads in the big features. Later I was with the Balboa Company, and then after another short season with Griffith, came to the Essany ranks. That's all there is to my said story."

# MAN FALLS 40 FEET AND LANDS ON BABY

Neither One Hurt and Tumbling Window Cleanar Disappears.

BROOKLYN, Sept. 6 .- One nost peculiar accidents of which the police have any record occurred yesterday, and four persons, including a baby, a man, a little girl, and a woman, were affected by it. The man and the baby escaped; the little girl was injured, and the woman, her mother, who has a weak heart, swooned when she heard a false report that her daughter

was about 155 pounds, which is interceting, in view of what happened. He seated himself on a window sill and started to mop the panes high above the street.

Isabella Boyden, a child of seven years, passed blithely along the sidewalk, wheeling in a carriage Earl Sparrow, eighteen months old.

Just as the carriage was underneath the windows where the man sat cleaning, he fell. Down he plumped with nothing to break his fall. He landed partly on the little nursemaid and partly on the carriage. Beneath the weight of 156 pounds, falling from a height of perhaps forty feet, the carriage collapsed like a toy balloon punctured by a pin.

Baby, man, and girl lay amid the debris of the carriage. Windows went up all about the neighborhood and all Skillman street poured forth to see what had hapsened. They expected to find three dead or seriously injured.

find three dead or seriously injured persons.

The baby sat up and gave vent to a long-drawn "Ee—wah!" making a mouth which resembled the opening of a subway klosk. By a miracle it was not even scratched; it was just good and mad, so it howled.

The little girl bore the brunt of the fall. She was injured about the spine and bruised. The man was as fortunate as the baby. He picked himself up, and, after tentatively trying his legs, to make sure that they worked properly, started off. He did not stop until he was out of sight. Nobody wants to stick around after falling three stories. Later he returned to hear how the little girl was doing, but disappeared again without giving his name or address.

Some highly thoughtful person ran to the home of Isabella's mother and shrieked out that the girl was dead. The sudden shock was too much for Mrs. Boyden's heart and she fainted.
